Education

Caldbrook University, Caldbrook May 2027
Bachelor of Science in Computer Science; Minor in Kinesiology GPA: 3.6/4.0
Coursework: Web Application Development, Kinesiology of Movement, Database Fundamentals,
Team Software Projects

Projects

Workout Tracker Next May 2026 – Sep 2026
TypeScript, React, Next.js, Tailwind CSS

- Rebuilt a personal workout tracker in Next.js and React after friends requested features the original version could not support.
- Styled the interface with Tailwind CSS across a 39-file codebase built over 11 active days.

Workout Tracker Aug 2025 – Sep 2026
Java, Spring Boot, PostgreSQL

- Built the original tracker as a Java Spring Boot application backed by PostgreSQL, my first project linking a frontend to a database.

Simongame Sep 2023 – Sep 2023
JavaScript, HTML, CSS

- Started with a small JavaScript memory game, the project that first pulled me toward building software instead of only using it.

Activities & Extracurriculars

Caldbrook Movement Collective, Tech Volunteer Sep 2025 – Present

- Ran short feedback sessions with club members testing the workout tracker, translating their scattered feature requests into a short prioritized list.
- Noticed requests centered on tracking progress rather than new exercises, which shifted my interest toward deciding what to prioritize, not just build.

Skills & Interests

Language: JavaScript, TypeScript, Java, SQL
Frontend: Next.js, React, Tailwind CSS, HTML/CSS
Backend: Node.js, Spring Boot
Data: MongoDB, PostgreSQL
