

Nakhin Polthai

AI Systems Engineer | Human-in-the-Loop Researcher

Education

CHULALONGKORN UNIVERSITY (EXPECTED GRADUATION JULY 2026)

B.Eng. Information and Communication Engineering

RAMKHAMHAENG ADVENT INTERNATIONAL SCHOOL (GRADUATE ON 2022)

Work Experience

**SeniorSoft Development Co., Ltd.,
AI Systems Engineer, Bangkok,
Thailand (Oct 2025 - Present)**

- Develop an automated AI support assistant to standardize responses and improve service efficiency.
- Built a web-based knowledge input portal for support staff to capture and maintain structured FAQs and resolutions.
- Continuously improved system performance by addressing immediate operational gaps identified through customer support team feedback

Gofive Co., Software Engineering Intern, Bangkok, Thailand (May 2025 - July 2025)

- Diagnosed and resolved production issues across frontend and backend systems in UAT environments.
- Contributed to UI/UX refinements by improving layout consistency, responsiveness, and form validation in Angular applications.
- Investigated API request/response flows in .NET (C#) services to trace root causes from logs and reports.
- Collaborated in an Agile workflow using Jira, strengthening debugging, communication, and cross-team coordination skills.

About Me

Final-year Information and Communication Engineering student at Chulalongkorn University with a strong interest in human-centered AI systems. Currently developing AI applications and governance frameworks to bridge technical capability with responsible human oversight. Passionate about designing AI systems that enhance, rather than replace, human decision-making.

Nakhinbill@gmail.com

Language

- Thai (Native)
- English (IELTS 8.0, 2022)

Activities & Interests

- Songwriting and guitar
- Tennis
- Strategic gaming (Top 3% SEA - Teamfight Tactics)

Relevant Courses

- Computer Programming
- Advanced Computer Programming
- Fundamental Data Structure and Algorithm
- Discrete Structures
- Probability & Statistics for Engineers
- Theory & Applications of Optimization
- Database Systems
- Data Warehousing
- Big Data and AI
- Introduction to Stochastic Models
- Natural Language Processing

Skills

Technical Skills

- Python
- .NET (C#)
- Angular
- Flutter
- SQL
- REST APIs
- Langgraph
- Langchain

Tools

- AWS (EC2, RDS, Glue)
- Jira
- Pandas
- Docker

Research Publications & Conferences

Design and Evaluation of a HITL Framework for AI Application Development (July 2025 - Present)

- Accepted for Presentation at International Electrical Engineering Congress (IEECON 2026), Thailand
- Co-conducted a multi-source qualitative study combining a retrospective chatbot development diary with semi-structured interviews of 8 AI experts from academia and industry.
- Performed five-cycle thematic analysis on 1,435 coded excerpts to identify patterns in AI governance, authority allocation, and lifecycle constraints.
- Developed structured insights on embedding human oversight and decision authority within organizational AI deployment.
- Contributed to the design of a Human-in-the-Loop framework for responsible and sustainable AI systems.

Design and Development of a Medication Management App for Elderly Individuals (July - Dec 2025)

- Presented research at the 2025 National and International Conference, National Institute of Development Administration (NIDA)
- Designed and developed a user-centered mobile app to improve medication adherence among elderly users
- Applied Design Thinking and AI-assisted usability analysis to translate user insights into system requirements
- Built scalable architecture using Flutter, Flask, MySQL, and AWS (EC2/RDS)
- Achieved SUS score 79.38, indicating strong usability and learnability
