Education

Marlowe College of Technology, Marlowe Bay June 2027
Bachelor of Arts in Digital Media; Minor in Computer Science GPA: 3.6/4.0
Coursework: Intro to Programming, Human-Centered Design, Systems Programming

Projects

Kube Credential, Personal Project Oct 2025 – Mar 2026
TypeScript, Docker, Jest

- Designed a microservice system for issuing and verifying credentials, containerizing each service with Docker and covering logic with Jest tests.
- Got pulled into the infrastructure side of the project after container networking issues took longer to fix than any UI bug.

Elevated Everyday Eye, Personal Project Nov 2025 – Sep 2026
TypeScript, React, Tailwind CSS

- Built a React and TypeScript interface styled with Tailwind CSS, iterating on layout after early feedback called it cluttered.
- Set up continuous integration to catch broken builds before they reached the deployed preview.

Carolene CV, Personal Project Apr 2025 – Oct 2025
HTML

- Built a personal portfolio site in plain HTML, an early project that first drew interest toward structuring a codebase well.

Activities & Extracurriculars

Marlowe Student Build Nights, Volunteer Mentor Feb 2026 – Present

- Helped classmates debug container startup failures during a campus build night, translating cryptic Docker logs into plain next steps.
- Discovered that explaining infrastructure problems clearly interested him as much as building the interfaces he once focused on.

Skills & Interests

Language: TypeScript, C/C++, Java, SQL
Frontend: HTML/CSS, Tailwind CSS, React
Backend: Spring Boot
Data: Data Modeling, Data Visualization, MySQL
DevOps: Docker, CI/CD, Kubernetes, Linux & Server Administration
Quality: Unit Testing
