

Astrid Kallen

Port Halvorsen | (555) 010-0103 | astrid@porthalvorsen.example | linkedin.example.com/in/astrid-kallen | github.example.com/astrid-kallen

Education

Halvorsen Coastal University, Port Halvorsen May 2026
Bachelor of Science in Computer Science; Minor in Rhetoric and Technical Communication
Coursework: Systems Programming, Databases, Technical Writing for Engineers

Projects

Rotala Aug 2021 – Mar 2025

Rust, Python, Dockerfile

- Engineered a backtesting engine in Rust with an automated test suite, CI pipeline and Docker packaging across 57 files.
- Documented the engine's assumptions after realizing undocumented edge cases made results hard for others to trust.

Pytho Public Jul 2023 – Jul 2023

Jupyter Notebook, Rust, JavaScript

- Built a mixed Rust, JavaScript and Jupyter Notebook project with Docker packaging and automated tests over 45 active days.
- Wrote setup notes after a teammate lost an afternoon to an environment mismatch the original code never mentioned.

Radiant Jan 2026 – Feb 2026

Python, Rust, FastAPI, SQLAlchemy

- Built a FastAPI service backed by SQLAlchemy, structuring the project with Rust components for performance-sensitive pieces.

Activities & Extracurriculars

Port Halvorsen Open-Source Study Group, Documentation Coordinator Sep 2025 – Present

- Started annotating confusing sections of a shared course repository after classmates kept asking the same setup questions.
- Turned scattered troubleshooting messages into a single reference page, cutting repeated questions in later semesters.

Skills & Interests

Language: Python, JavaScript, SQL

Frontend: Next.js, React

Backend: Flask/FastAPI

Data: Data Modeling, Data Analysis (pandas)

DevOps: Docker, CI/CD, Kubernetes

Quality: Unit Testing
