Education

Harrowgate College , Fenwick Bay	May 2028
Bachelor of Science in Computer Science	GPA: 3.5/4.0
Coursework: Intro to Networks, Data Structures, Operating Systems	

Projects

Nodepay2ndid	Dec 2024 – Mar 2026
---------------------	---------------------

Python

- Built an asynchronous Python client using aiohttp to manage concurrent network sessions across a 9-file automation tool.
- Iterated on request headers and identity rotation after target services began flagging traffic as automated.

Nodepay Autoref2	Dec 2024 – Mar 2026
-------------------------	---------------------

Python

- Integrated third-party CAPTCHA-solving APIs into a Python automation project, coordinating multiple verification providers across 6 files.
- Compared solver providers after the first integration proved unreliable under load, settling on a more consistent combination.

Twitch Boost V1.5 Tools	Nov 2019 – Sep 2026
--------------------------------	---------------------

C++, C, PowerShell

- Wrote C++ and C utilities with PowerShell scripting to automate stream-engagement testing across a 61-file toolset.

Activities & Extracurriculars

Fenwick Bay Security Reading Group , Organizer	Feb 2026 – Present
---	--------------------

- Started a peer discussion group after noticing his own automation scripts kept tripping the same anti-bot defenses he was trying to avoid.
- Shifted personal focus from bypassing detection systems to understanding how they identify automated behavior in the first place.

Skills & Interests

Language: JavaScript, Python, C/C++

DevOps: AWS (Advanced)
