Experience

Thornfield Harbor Distribution Center, Thornfield Harbor Jan 2019 – Jun 2023
Inventory Operations Coordinator

- Tracked shipment and inventory records across spreadsheets shared by three shifts, and repeatedly found conflicting counts after handoffs.
- Built a validation-rule spreadsheet to catch entry errors before the next shift, sparking interest in sturdier data systems.

Projects

Dumbest Graph App Oct 2023 – Jul 2024
TypeScript, Express, Prisma, React

- Modeled relational data with Prisma and Express, building a graph visualization app after leaving the warehouse floor for coursework.
- Iterated on the schema over 34 active days as the data model grew messier than expected.

September Testing Sep 2021 – Oct 2022
TypeScript, SCSS

- Set up continuous integration and an automated test suite for a TypeScript project, treating reliability as a first-class concern.

Bpm Light Mar 2024 – Mar 2024
TypeScript, Vue, JavaScript

- Prototyped a lightweight business-process tool in Vue and TypeScript, drawing on firsthand experience with brittle handoff processes.

Education

Thornfield Harbor Technical College, Thornfield Harbor Aug 2024
Associate of Applied Science in Web & Systems Development
Coursework: Relational Database Design, Systems Administration, Web Application Development, Version Control & Collaboration

Activities & Extracurriculars

Thornfield Harbor Career-Change Coders, Group Organizer Sep 2023 – Present

- Started a study group for other career-changers learning web development, organizing sessions around debugging real projects instead of tutorials.

Skills & Interests

Language: TypeScript, SQL
Frontend: Tailwind CSS, React, Vue (Advanced)
Backend: Node.js
Data: Data Modeling
DevOps: CI/CD
Quality: Unit Testing
