Projects

Gamejam2020 Jan 2020 – Feb 2020
C++

- Built a C++ prototype in 48 hours for a game jam, focusing on getting core mechanics working under a tight deadline.

Personal Website Jun 2020 – Apr 2023
HTML, JavaScript, CSS

- Maintained a personal website in HTML, JavaScript and CSS over three years, revisiting it repeatedly to try new front-end techniques.

Stag Dd Dec 2025 – May 2026
JavaScript, Next.js, MongoDB

- Built a JavaScript and Next.js app backed by MongoDB, modeling data with Mongoose across a 16-day development stretch.
- Styled the interface with plain CSS, iterating on layout after early versions felt cluttered on smaller screens.

Activities & Extracurriculars

Fenwick Bay Game Jam Collective, Jam Participant & Organizer Jan 2020 – Present

- Helped run a recurring 48-hour game jam, coordinating team formation and keeping a shared task board updated for participants.
- After a chaotic first event, drafted a simple event-day schedule that cut down last-minute confusion for teammates.
