### Education

|                                                                            |              |
|----------------------------------------------------------------------------|--------------|
| <b>Alderwood Institute</b> , Alderwood                                     | June 2027    |
| Bachelor of Science in Computer Science; Minor in Rhetoric and Composition | GPA: 3.8/4.0 |
| Coursework: Algorithms, Technical Communication, Discrete Mathematics      |              |

### Projects

|                    |                     |
|--------------------|---------------------|
| <b>Mathematics</b> | Dec 2019 – Sep 2026 |
|--------------------|---------------------|

C++

- Maintained a large C++ repository of algorithmic and mathematical problem solutions, sustaining 200 commits over 56 active days.
- Reorganized solutions after realizing files with only code and no explanation were hard for others to follow later.

#### Contest

Nov 2024 – Sep 2026

C++, Python

- Wrote C++ and Python solutions for programming contest problems across 92 files, tracked over 105 active days of practice.

#### Personal Website

Dec 2019 – Sep 2026

HTML, SCSS, JavaScript

- Built and maintained a personal site in HTML, SCSS and JavaScript across 346 files to publish write-ups alongside project code.
- Expanded the site after friends asked for the reasoning behind solutions, not just the finished implementations.

### Activities & Extracurriculars

|                                                            |                    |
|------------------------------------------------------------|--------------------|
| <b>Alderwood Problem Solving Circle</b> , Peer Facilitator | Jan 2025 – Present |
|------------------------------------------------------------|--------------------|

- Walks newer members through algorithmic solutions line by line after noticing that shared code alone rarely helped them learn.
- Started keeping written notes on common misunderstandings, which the circle now reuses when onboarding new members.

### Skills & Interests

**Language:** C/C++

**Frontend:** HTML/CSS
