

Nadia Sorel

Willowmere | (555) 010-0161 | nadia.sorel@willowmere.example | linkedin.example.com/in/nadia-sorel | github.example.com/nadia-sorel

Education

Willowmere Academy of Interactive Computing, Willowmere May 2027
Bachelor of Science in Interactive Computing; Minor in Behavioral Studies GPA: 4.2/5.0
Coursework: Mobile Interaction Studio, Software Verification Concepts, Human Behavior and Technology

Experience

Pebblepath Digital Workshop, Willowmere May 2026 – Aug 2026
Application Development Intern

- Reproduced ambiguous application issues by recording the exact interaction sequence and conditions instead of changing code, giving teammates a common failure description.
- Noticed vague reports caused repeated back-and-forth, began asking for expected behavior, observed behavior and steps before it, drawn toward software reliability work.

Projects

Aichat, Independent Project Mar 2026 – Sep 2026
Swift

- Developed an advanced-architecture AI chat application in Swift across 144 repository files.
- Iterated on the application through 101 commits over 45 active development days.

Fullstack Ecommercewebsite, Independent Project Sep 2025 – Nov 2025
JavaScript, CSS, HTML

- Built a JavaScript, CSS and HTML e-commerce website across 208 repository files.
- Included an automated test suite alongside the application code.

Yc Startup App, Independent Project Oct 2025 – Aug 2026
TypeScript, CSS, JavaScript, Next.js

- Built a Next.js startup-directory application with Sanity CMS, NextAuth and user profiles, using TypeScript, CSS and JavaScript over 9 commits.

Activities & Extracurriculars

Willowmere Puzzle Exchange, Scenario Editor Oct 2025 – Present

- Edited peer-written logic puzzles by trying unusual interpretation paths and flagging cases where the stated rules permitted more than one answer.
- When authors could not reproduce a confusing path, rewrote feedback as exact steps, a practice carried into how she described software failures.

Skills & Interests

Language: JavaScript, Python, TypeScript
Frontend: HTML/CSS, Next.js, Tailwind CSS
Data: Data Analysis (pandas)
Quality: Unit Testing
Mobile: Native iOS/Android
