Education

Rosemont Institute of Technology, Rosemont June 2027
Bachelor of Science in Computer Science
Coursework: Software Testing, Systems Programming, Web Application Development, Operating Systems

Projects

Regilattice Mar 2026 – Sep 2026
C#, PowerShell, Docker

- Built a C# and PowerShell toolkit for Windows registry tweaks, shipping both a WinForms GUI and a CLI across 597 files.
- Set up continuous integration and Docker packaging, and grew the project to 12 stars from other developers.

Woodworkingshop Apr 2026 – Sep 2026
TypeScript, React, Playwright

- Built a React and TypeScript browser PWA for cabinet planning, implementing bin-packing logic to reduce material waste in cut lists.
- Wrote an automated test suite with Playwright and accessibility checks, catching regressions before they reached the exported PDF or DXF output.

Crosstide Apr 2026 – Sep 2026
TypeScript, Cloudflare Workers, Docker

- Developed a TypeScript stock-analysis PWA on Cloudflare Workers, implementing technical indicators and a consensus signal system.
- Configured CI, an automated test suite and Docker packaging, treating reliability as part of the build from day one.

Activities & Extracurriculars

Rosemont Open-Source Study Group, Contributor Reviewer Apr 2026 – Present

- Reviewed pull requests from newer contributors on personal projects, catching untested edge cases before merge.

Skills & Interests

Language: TypeScript, JavaScript, C#, C/C++, SQL
Frontend: React, Tailwind CSS, Frontend State Management
Data: Web Scraping, Data Modeling
DevOps: CI/CD, Docker, Linux & Server Administration
Quality: Unit Testing, Integration & E2E Testing
Mobile: Native iOS/Android
Product: Technical Writing
