Education

Duskridge Technical Academy, Duskridge June 2028
Bachelor of Science in Computer Engineering GPA: 3.4/4.0
Coursework: Digital Logic, Introduction to Assembly Programming, Computer Architecture, Intro to Cybersecurity

Projects

Sidbox Hw Barebones Dec 2025 – Dec 2025
C, Makefile, Assembly, Linker Script

- Wrote bare-metal C and ARM assembly startup code for custom hardware, working directly with a custom linker script to control memory layout.

Sidbox Projects Applets Nov 2025 – Feb 2026
C, Assembly, Makefile, Batchfile

- Wrote low-level applications in C and ARM Thumb-2 assembly for custom hardware, documenting the toolchain setup for future contributors.

Sidbox Softwares Nov 2025 – Sep 2026
Makefile, C++, CMake, C

- Built C and C++ command-line tools to test and package hardware project components, automating parts of the build with shell scripts.

Activities & Extracurriculars

Duskridge Hardware Hackers, Member Jan 2026 – Present

- A memory corruption bug in the bare-metal startup code sparked curiosity about how the same bug class could be exploited, not fixed.

Skills & Interests

Language: Shell Scripting, C/C++
