

Marcus Delgado

Rivermoor | (555) 010-0114 | marcus@rivermoor.example | linkedin.example.com/in/marcus-delgado | github.example.com/marcus-delgado

Education

Castleport University, Rivermoor May 2027
Bachelor of Science in Computer Engineering; Minor in Technical Communication GPA: 3.7/4.0
Coursework: Computer Architecture, Operating Systems, Embedded Systems, Technical Writing

Projects

Ysux Workbench Jan 2026 – Sep 2026

C, C++, Makefile, Python

- Organized a large C/C++ hardware workbench spanning thousands of files into buildable Makefile targets, packaging the toolchain with Docker for consistent runs.
- Kept a running build log after an untracked change forced a full day's rebuild, using it to trace which modules needed rebuilding across 200 commits.

Solar Feb 2026 – Sep 2026

Python

- Wrote an automated pytest suite for a Python utility project, configuring test options and code formatting with black to keep contributions consistent.

Activities & Extracurriculars

Castleport Computer Engineering Society, Build Coordinator Sep 2025 – Present

- Noticed teammates on a shared embedded project repeatedly duplicating setup steps and started a shared checklist covering environment, build flags, and test commands.
- Tracked open tasks across three student teams preparing for a systems showcase, flagging blocked items during weekly check-ins so handoffs did not stall.

Skills & Interests

Language: Python, C/C++, Shell Scripting

DevOps: Docker

Quality: Unit Testing

Product: Technical Writing
