Education

Ashgrove Landing College, Ashgrove Landing May 2028
Bachelor of Science in Computer Science; Minor in Economics GPA: 3.7/4.0
Coursework: Machine Learning, Web Development, Applied Statistics, Microeconomics

Projects

Venturex Optimizer Mar 2026 – Mar 2026

TypeScript, CSS, HTML

- Built a TypeScript and React tool to compare business-class flight redemptions across airline transfer partners.
- Wrote Playwright end-to-end tests after early manual checks missed broken redemption-rate lookups.

Fraud ML Classification Nov 2025 – Nov 2025

Jupyter Notebook

- Trained an XGBoost model on auto-loan data to flag fraud, comparing models and tuning hyperparameters for recall.
- Used SHAP to inspect which features drove flagged cases, questioning results that looked too clean before trusting them.

AI Agent Job Pipeline Feb 2026 – Feb 2026

Python

- Built a Python pipeline using an LLM and Selenium to parse job postings against a resume-matching taxonomy.

Activities & Extracurriculars

Ashgrove Data Ethics Reading Group, Discussion Facilitator Feb 2026 – Present

- Facilitated discussions on algorithmic bias in lending models, connecting readings to her own fraud-model results.

Skills & Interests

Language: Python, TypeScript

Frontend: Tailwind CSS, React

Data: Data Analysis (pandas), Web Scraping, Data Visualization

AI/ML: Machine Learning, LLM Application Development, Deep Learning, Natural Language Processing

DevOps: CI/CD

Quality: Integration & E2E Testing, Unit Testing
