Education

Rivermoor Polytechnic , Rivermoor	June 2026
Bachelor of Science in Computer Engineering	GPA: 3.9/4.0
Coursework: Database Systems, Distributed Systems, Software Testing	

Projects

Lecionario , Personal Project	Aug 2025 – Sep 2026
TypeScript, HTML, CSS, Docker	
- Built a large TypeScript web application across roughly 500 files, adding an automated test suite and CI to catch regressions early. - Packaged the application with Docker so teammates could run an identical environment instead of debugging local setup differences.	

Scriptorium Divinum , Personal Project	Aug 2025 – Aug 2026
TypeScript, PLpgSQL, Python	
- Modeled relational data in PLpgSQL for a content-heavy TypeScript application, then wrote automated tests around the trickiest queries. - Introduced stricter ESLint rules after a subtle bug slipped past review, cutting down on repeated review comments.	

A Bancada Evangelica , Personal Project	Aug 2025 – Sep 2026
TypeScript, NestJS, Playwright, React	
- Built a NestJS backend and React frontend to evaluate public figures against defined criteria using official public data sources. - Wrote end-to-end tests with Playwright after early manual QA missed a data-parsing edge case, catching similar issues automatically since.	

Activities & Extracurriculars

Rivermoor Dev Circle , Testing Practices Lead	Jan 2026 – Present
- Started a weekly session where classmates traded flaky-test fixes, after noticing several projects shipped without any automated tests. - Learned that a small, consistent testing habit prevented more bugs than any single clever fix.	

Skills & Interests

Language: TypeScript, SQL
Frontend: HTML/CSS, Tailwind CSS, React
Backend: Node.js
Data: Data Modeling, Data Visualization
DevOps: Docker, Linux & Server Administration, CI/CD, Kubernetes
Quality: Unit Testing, Integration & E2E Testing
Mobile: React Native
Product: Technical Writing
