

## Naledi Mokoena

Thornfield | (555) 010-0106 | naledi@thornfield.example | github.example.com/naledi-mokoena

### Education

---

**Thornfield University**, Thornfield May 2028  
Bachelor of Science in Computer Science; Minor in Science, Technology, and Policy  
Coursework: Intro to Machine Learning, Data Ethics, Systems Fundamentals

### Projects

---

**EDA Red Wine Quality** May 2021 – Jan 2023

Jupyter Notebook, pandas, matplotlib, Keras, Prometheus

- Ran exploratory analysis on a red wine quality dataset in Jupyter, using pandas and matplotlib to inspect feature distributions.
- Logged evaluation metrics with Prometheus while testing a small Keras model, prompting questions about what normal metric behavior looked like.

**Tutorial Feature Engineering In ML** Jan 2021 – Sep 2021

Jupyter Notebook

- Worked through feature engineering techniques in Jupyter Notebook, documenting each transformation's effect on a sample dataset across 22 files.

**Tutorial Pymongo** Jan 2021 – Jan 2023

Jupyter Notebook, MongoDB

- Practiced MongoDB operations from Python in a Jupyter notebook, building small scripts to insert, query and update sample records.

### Activities & Extracurriculars

---

**Thornfield Data Ethics Reading Group**, Discussion Facilitator Sep 2022 – Jan 2023

- Noticed classmates trusted model outputs without questioning input data quality, so proposed a recurring discussion on dataset reliability.
- Facilitated sessions comparing how small data or metric errors could mislead a system meant to catch anomalies.

### Skills & Interests

---

**Language:** Python, JavaScript

**Backend:** Flask/FastAPI

**Data:** Data Analysis (pandas), Data Visualization

**AI/ML:** Machine Learning, Deep Learning

**DevOps:** Monitoring & Logging
