

Dahlia Okoye

Bellhaven | (555) 010-0157 | dahlia@bellhaven.example | linkedin.example.com/in/dahlia-okoye | github.example.com/dahlia-okoye

Education

Bellhaven Institute of Technology , Bellhaven	May 2027
Bachelor of Science in Computer Science; Minor in Organizational Studies	GPA: 3.6/4.0
Coursework: Software Engineering, Databases, Team Project Practicum	

Projects

Hora Light MVP	Sep 2025 – Sep 2026
-----------------------	---------------------

Go, TypeScript

- Built the MVP for a personal productivity product in Go and TypeScript across 315 files, backed by an automated test suite.
- Coordinated which backend and frontend pieces needed to land together after a mismatched deploy briefly broke onboarding.

Hora Web	Jun 2025 – Jul 2025
-----------------	---------------------

JavaScript, CSS, HTML, React

- Developed the initial web client in JavaScript, CSS and HTML across 72 files using React and Tailwind CSS.

Sliceapp	Feb 2026 – Feb 2026
-----------------	---------------------

TypeScript, Go

- Built Sliceapp, a TypeScript and Go tool that breaks larger goals into daily steps, across 67 files.
- Reworked the daily-step logic after early testers found the default breakdown too rigid to actually follow.

Activities & Extracurriculars

Hora Project , Independent Product Coordinator	Jun 2025 – Present
---	--------------------

- Tracked dependencies across four related repositories after a landing-page release referenced an API endpoint the backend had not shipped yet.
- Started writing short milestone notes before each release, which reduced confusion about what was ready to ship.

Skills & Interests

Language: JavaScript, TypeScript, Go, SQL

Frontend: Tailwind CSS, React

Data: Data Modeling

DevOps: Linux & Server Administration, Docker

Quality: Unit Testing

Mobile: React Native
