### Education

**Brindlewood Polytechnic**, Brindlewood May 2024  
Bachelor of Science in Computer Science GPA: 3.8/4.0  
Coursework: Machine Learning Systems, Distributed Systems, Databases, Software Engineering

### Projects

**MLflow Experiment Tracking** May 2024 – Jun 2024  
Python, Jupyter Notebook

- Set up MLflow experiment tracking across a 211-file project, logging model runs during a machine-learning operations training program.

**MLOps Monitoring with Grafana and Evidently** Jun 2024 – Jun 2024  
Python, Docker, PostgreSQL

- Built a monitoring pipeline with Evidently and Grafana in Docker to track model drift, connecting metrics to a PostgreSQL backend.
- Containerized the monitoring stack with Docker so metrics dashboards could run independent of the training environment.

**MLOps Batch Deployment** Jun 2024 – Jun 2024  
Python, Docker

- Packaged a batch-scoring pipeline with Pipenv and Docker, using pandas and scikit-learn to structure the deployment workflow.

### Activities & Extracurriculars

**Brindlewood MLOps Cohort**, Cohort Participant Jul 2024 – Aug 2024

- After scraped review data for a sentiment-analysis side project came in inconsistent formats, learned why reliable pipelines mattered more than model choice.
- Maintained a shared troubleshooting log for cohort peers working through the same deployment exercises, cutting down repeated setup questions.

### Awards & Accomplishments

Dean's List, Fall 2023

### Skills & Interests

**Language:** Python

**Frontend:** HTML/CSS

**Data:** Data Analysis (pandas), Data Visualization, ETL & Data Pipelines, Web Scraping, PostgreSQL

**AI/ML:** Machine Learning, Natural Language Processing

**DevOps:** Docker
