Experience

Calderbrook Distribution Center, Calderbrook Jan 2023 – Dec 2025
Inventory Operations Coordinator

- Managed manual weighing logs for incoming freight, tracking discrepancies that recurred when handwritten records didn't match scale readings.
- Grew frustrated with recurring downtime on the warehouse's shared Windows terminals, and began teaching myself scripting to diagnose recurring failures.

Projects

Automaticweighingsystem Jun 2026 – Jul 2026
C#

- Built a C# application to automate freight weighing logs, replacing the handwritten process from a previous logistics role.
- Structured the implementation across 162 files over 18 commits, translating a familiar manual workflow into working software.

PE.UI Jun 2026 – Jul 2026
C#, Batchfile, Linux

- Wrote a C# and batch-scripting utility spanning 757 files, extending the systems-administration skills first sparked by warehouse terminal troubleshooting.
- Tested the utility's behavior across a small Linux server environment to build confidence before wider use.

Education

Calderbrook Technical College, Calderbrook May 2026
Bachelor of Science in Information Systems; Minor in Operations Management
Coursework: Systems Administration, Network Fundamentals, Database Systems, Software Testing

Skills & Interests

Language: C#, TypeScript
Frontend: Vue, Tailwind CSS
DevOps: Linux & Server Administration
Quality: Unit Testing
