Education

Wrenfield Institute of Technology, Wrenfield May 2028
Bachelor of Science in Computer Science; Minor in Public Policy GPA: 3.7/4.0
Coursework: Web Application Development, Database Systems, Intro to Systems Security

Projects

MONEY Jun 2026 – Aug 2026

TypeScript, Next.js, React

- Built a personal finance dashboard with Next.js and React, using recharts to visualize spending patterns from structured data.
- Modeled the underlying PostgreSQL schema for transaction records, tightening field constraints after a bad import produced inconsistent categories.

Product Mar 2026 – Sep 2026

TypeScript, PLpgSQL, Next.js

- Developed a Next.js and PostgreSQL application across sustained daily commits, writing PLpgSQL for server-side data logic.
- Configured Linux server deployment and access for the app, prompting closer attention to who could reach the database directly.

Jungsan Mar 2026 – Sep 2026

TypeScript, PLpgSQL, JavaScript

- Built a TypeScript and PLpgSQL program with continuous integration, catching schema regressions before they reached the deployed database.

Activities & Extracurriculars

Wrenfield Web Security Reading Group, Regular Member Feb 2026 – Present

- After noticing how much financial data her own project stored, started reading about access control and joined a peer security discussion group.
- Began treating every new database table as a question of who should be able to read it, not just how to query it.

Skills & Interests

Language: TypeScript, JavaScript, SQL

Frontend: Next.js, React, Tailwind CSS

Data: PostgreSQL, Data Visualization, Data Modeling

DevOps: Linux & Server Administration, CI/CD
