### Education

|                                                                   |              |
|-------------------------------------------------------------------|--------------|
| <b>Fjordane Institute of Technology</b> , Isbrekke                | June 2026    |
| Bachelor of Science in Computer Science                           | GPA: 3.5/4.0 |
| Coursework: Operating Systems, Computer Networks, Web Development |              |

### Projects

|                                                                                                                                                                                                                                                                                                      |                     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| <b>Madmail</b> , Personal Project                                                                                                                                                                                                                                                                    | Sep 2021 – Sep 2026 |
| Go, Docker                                                                                                                                                                                                                                                                                           |                     |
| <ul style="list-style-type: none"><li>Contributed to a self-hosted encrypted mail server written in Go, packaging services with Docker for reproducible deployment.</li><li>Added test coverage around message handling after an early manual test missed an edge case in address parsing.</li></ul> |                     |
| <b>Lifestyle App</b> , Personal Project                                                                                                                                                                                                                                                              | Sep 2022 – Oct 2025 |
| Vue, JavaScript                                                                                                                                                                                                                                                                                      |                     |
| <ul style="list-style-type: none"><li>Built a Vue-based lifestyle tracking app, structuring components after an earlier single-file version became hard to navigate.</li></ul>                                                                                                                       |                     |
| <b>KHMER FOOD</b> , Personal Project                                                                                                                                                                                                                                                                 | Jul 2022 – Feb 2026 |
| HTML, CSS                                                                                                                                                                                                                                                                                            |                     |
| <ul style="list-style-type: none"><li>Put together a small HTML and CSS site cataloguing family recipes, a low-stakes project for practicing plain markup.</li></ul>                                                                                                                                 |                     |

### Activities & Extracurriculars

|                                                                                                                                                                                                                                                                                                                   |                    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| <b>Fjordane Homelab Group</b> , Server Maintainer                                                                                                                                                                                                                                                                 | Jan 2024 – Present |
| <ul style="list-style-type: none"><li>Kept a small group of self-hosted services running on a home Kubernetes cluster, writing short runbooks after repeated late-night restarts.</li><li>Learned that clear runbooks mattered more than clever configuration once anyone else needed to fix an outage.</li></ul> |                    |

### Skills & Interests

**Language:** Go, JavaScript  
**Frontend:** HTML/CSS, Vue  
**DevOps:** Docker, Kubernetes  
**Quality:** Unit Testing  
**Product:** Technical Writing
