Education

Alderbrook University , Alderbrook	June 2026
Bachelor of Science in Computer Science; Minor in Applied Mathematics	GPA: 3.85/4.0
Coursework: Algorithms, Discrete Mathematics, Software Design	

Projects

Command , Personal Project	Apr 2021 – Sep 2026
Go	

- Built a Go command-line tool refined over many small iterations, adding tests as edge cases surfaced during everyday use.
- Kept the tool's behavior backward compatible across dozens of small releases by relying on its test suite before each change.

Termin All Or Nothing , Personal Project	Aug 2022 – Oct 2025
TypeScript	

- Built a VS Code extension in TypeScript, writing a test suite around its editor integration using a custom test stubber.
- Debugged inconsistent extension behavior across editor versions, learning to isolate environment differences before touching application logic.

Euler Challenge , Personal Project	Dec 2021 – Sep 2026
Go, Python, Shell	

- Solved a long series of computational problems in Go and Python, generating charts and PDFs to visualize each solution.

Activities & Extracurriculars

Alderbrook CS Peer Consulting , Peer Tutor	Sep 2025 – Present
---	--------------------

- Volunteered to debug classmates' projects across unfamiliar languages and frameworks, often starting with only a vague description of the bug.
- Found that asking for a minimal reproduction case before diving in saved far more time than guessing at the cause.

Skills & Interests

Language: TypeScript, Go
Data: Data Analysis (pandas)
Quality: Unit Testing
Product: Technical Writing
