Education

Cobbleford State University, Cobbleford May 2027
Bachelor of Science in Computer Science; Minor in Professional Writing GPA: 3.7/4.0
Coursework: Digital Logic Design, Data Structures, Technical Communication, Software Testing

Projects

TTL Simulator Jul 2026 – Aug 2026

Java

- Built a transistor-transistor logic simulator in Java to model simple TTL circuit behavior across 56 files.
- Wrote JUnit test suites to validate logic gate behavior before assembling larger simulated circuits.

Java Coursework Project Dec 2022 – Oct 2025

Java, HTML, CSS

- Developed a Java application with an HTML and CSS interface, structured across 100 files during early coursework.

Activities & Extracurriculars

Cobbleford Coding Circle, Peer Tutor Sep 2024 – Present

- After classmates struggled to follow classroom explanations of logic circuits, wrote supplementary walkthroughs breaking down gate-level behavior step by step.
- Noticed recurring questions during tutoring sessions and organized answers into a shared reference document, reducing repeated explanations.

Skills & Interests

Language: Java, Python

Frontend: HTML/CSS

Quality: Unit Testing
