Education

Nordhaven Polytechnic, Nordhaven

June 2027

Bachelor of Science in Software Engineering; Minor in Organizational Studies

Coursework: Mobile App Development, Database Systems, Team Leadership Seminar, Web Application Development

Projects

App Kilometros Completa

Nov 2025 – Sep 2026

Kotlin, PLpgSQL, TypeScript

- Built a Kotlin mobile app for logging running distance, backing it with a PLpgSQL database and a TypeScript companion service.
- Sustained 162 commits over 49 active days, coordinating schema changes across the mobile client and database layer alone.

Cot Admin Next

Dec 2025 – Sep 2026

TypeScript, Next.js, Tailwind CSS, React

- Developed a Next.js and Tailwind CSS admin dashboard in TypeScript, structuring the React component layer for a client project.
- Noticed undocumented handoffs between codebases caused repeated setup confusion, and began writing short README notes to close the gap.

Activities & Extracurriculars

Nordhaven Student Dev Collective, Project Coordinator

Jan 2026 – Present

- Took ownership of merge scheduling after two peers' features silently overwrote each other, introducing a shared branching checklist.
- Learned that clarifying who owned which module mattered more than writing more code, and shifted toward coordinating others' work.

Skills & Interests

Language: TypeScript, SQL

Frontend: HTML/CSS, Next.js, Tailwind CSS, React

Data: Data Modeling

DevOps: Linux & Server Administration

Mobile: Native iOS/Android
