

Priya Nandakumar

Fernbrook | (555) 010-0101 | priya@fernbrook.example | github.example.com/priya-nandakumar

Education

Fernbrook Institute of Technology, Fernbrook

May 2027

Bachelor of Science in Computer Science

Coursework: Data Structures, Intro to Software Engineering, Technical Communication

Projects

Megacalc

Mar 2026 – Mar 2026

Python, Plotly

- Built a terminal-based step-by-step calculator covering PreCalc 12 topics, adding optional graphing through Plotly for visual verification.
- Structured the codebase across 19 files to keep calculation logic separate from the command-line interface.

Bitshell

Mar 2026 – Mar 2026

JavaScript, HTML, CSS

- Developed a browser extension converting binary, hex, decimal and text with automatic format detection and IPv4/IPv6 support.
- Added a right-click context menu and conversion history so users could reuse recent lookups without retyping values.

Skribblpro

Mar 2026 – Mar 2026

JavaScript

- Built a browser extension that suggests words in real time using frequency analysis learned from prior rounds played.
- Iterated on the filtering logic after early guesses surfaced irrelevant words, tightening the matching criteria.

Activities & Extracurriculars

Fernbrook Coding Circle, Peer Debugging Session Lead

Feb 2026 – Present

- Noticed classmates abandoning side projects after getting stuck alone, so started a weekly drop-in debugging session.
- Began keeping a shared log of recurring issues, which shortened later sessions once patterns became easy to recognize.

Skills & Interests

Language: JavaScript, Python, Shell Scripting

Frontend: HTML/CSS
