

Marcus Adeyemi

Ridgeport | (555) 010-0153 | marcus@ridgeport.example | linkedin.example.com/in/marcus-adeyemi | github.example.com/marcus-adeyemi

Education

Kestrel Polytechnic , Ridgeport	May 2027
Bachelor of Science in Computer Science; Minor in Entrepreneurship Studies	GPA: 3.7/4.0
Coursework: Data Structures, Software Design, Intro to Venture Building	

Projects

Deltaencoder	Jan 2020 – Sep 2026
---------------------	---------------------

Java

- Built a Java image-compression tool encoding pixel deltas, iterating across 200 commits over 82 active days to refine accuracy.
- Rewrote core encoding logic after early output distorted certain image formats, tightening delta calculations for reliability.

Datamapper

Dec 2019 – Sep 2026

Java

- Developed a Java data-mapping utility across 9 files, sustaining 200 commits over 109 active days of iterative refinement.
- Restructured the mapping schema mid-project after realizing the original format could not handle irregular inputs.

Deltaencoder3

Sep 2026 – Sep 2026

Python

- Restarted the encoder in Python to test whether the same compression logic could reach a broader set of users.

Activities & Extracurriculars

Kestrel Founders Lab , Student Member	Sep 2025 – Present
--	--------------------

- Pitched the delta-encoding tool at a campus venture showcase, fielding questions about who would actually use it.
- Learned that a tool built for oneself needs simpler onboarding before someone else will try it, and began rewriting accordingly.

Skills & Interests

Language: Java, Python
