

Julien Faucher

Vireux | (555) 010-0173 | julien.faucher@vireuxtech.example | linkedin.example.com/in/julien-faucher | github.example.com/julien-faucher

Education

Vireux Institute of Applied Sciences, Vireux June 2027
Bachelor of Science in Computer Science GPA: 3.5/4.0
Coursework: Web Application Development, Databases, Object-Oriented Programming, Software Testing

Projects

GSB Fee Management Dec 2021 – Sep 2022
PHP, Twig, CSS

- Built a fee-management web application in PHP with Twig templates, structuring data models across 113 files.
- Noticed the fee-approval workflow lacked clear role separation and began mapping which user actions should require authorization.

GSB RV DR Dec 2021 – Dec 2021
Java, JavaFX

- Developed a JavaFX desktop client for consulting sales-visit reports, backed by a Java service layer.
- Wrote JUnit tests for the reporting module after inconsistent input data caused unexpected report failures.

Activities & Extracurriculars

Vireux Dev Study Group, Co-organizer Jan 2022 – Sep 2022

- After a teammate's form accepted unvalidated input during a class project, proposed a pre-submission checklist covering input handling for future assignments.
- Began reading about common web application vulnerabilities, drawn from firsthand frustration with the fee-management app's access design.

Skills & Interests

Language: Java, Python, SQL
Frontend: HTML/CSS
Data: Data Modeling
Quality: Unit Testing
