Education

Millhaven Institute of Technology, Millhaven

May 2027

Bachelor of Science in Computer Science

GPA: 3.6/4.0

Coursework: Software Testing, Game Programming, Systems Programming

Projects

Game Dev Kit, Independent Project

Apr 2025 – Sep 2026

C#

- Built a reusable C# toolkit of common game systems, maintained across 596 files and 78 commits.
- Set up continuous integration checks after a broken build shipped to a teammate undetected for days.

Zoo Tycoon, Independent Project

May 2026 – May 2026

C#, ShaderLab, HLSL

- Built an isometric zoo-building game in C# with custom ShaderLab and HLSL shaders across 4,082 files.
- Reproduced an animal-pathing bug that only appeared after specific save-and-reload sequences, then documented the steps.

Magic Tiles, Independent Project

Jun 2026 – Jul 2026

C#, ShaderLab, CSS, HLSL

- Built a rhythm game in C# and HLSL where tapped tiles must sync with the beat.
- Tracked down timing bugs caused by frame-rate drift between different devices during testing.

Activities & Extracurriculars

Millhaven Student Devs, Bug Bash Organizer

Feb 2026 – Present

- Organized peer bug-hunting sessions for classmates' game projects, using a shared checklist for reporting steps.
- Noticed vague bug reports wasted testing time and required environment, sequence, and expected behavior for each report.

Skills & Interests

Language: C#, TypeScript

DevOps: CI/CD

Mobile: Native iOS/Android
