Education

Fenwick State University , Fenwick	May 2027
Bachelor of Science in Computer Science	GPA: 3.6/4.0
Coursework: Database Systems, Web Application Development, Software Testing	

Projects

Icd10 Suggest Service , Independent Project	Mar 2026 – Apr 2026
Java, HTML	
- Built a Java Spring Boot service with MySQL and PostgreSQL connectors to suggest diagnosis codes from input data. - Wrote an automated test suite after early manual checks missed inconsistent suggestions between similar inputs.	

Pharmacy Service , Independent Project	Apr 2026 – May 2026
Java, HTML, JavaScript, CSS	
- Built a Java backend for a pharmacy service prototype with an HTML and JavaScript frontend. - Packaged the service with Docker after struggling to reproduce a teammate's local environment issue.	

Zohiomj , Independent Project	Nov 2024 – Nov 2024
TypeScript, CSS, JavaScript	
- Built a TypeScript web project across 50 files, applying frontend patterns from Java backend work. - Compared how the same data modeling ideas applied differently on the frontend versus the backend.	

Activities & Extracurriculars

Fenwick Dev Study Group , Code Review Lead	Jan 2026 – Present
- Led peer code reviews for classmates' backend projects, focusing feedback on data modeling choices. - Noticed reviews stalled on style debates and introduced a shared checklist to keep discussion on logic.	

Skills & Interests

Language: Java, C#, TypeScript, SQL
Frontend: HTML/CSS, Next.js, Tailwind CSS
Backend: Spring Boot
Data: MySQL, PostgreSQL, Data Modeling
DevOps: Docker
Quality: Unit Testing
