

Priya Nandakumar

Coastview | (555) 010-0145 | priya@coastview.example | linkedin.example.com/in/priya-nandakumar | github.example.com/priya-nandakumar

Education

Coastview University, Coastview June 2027
Bachelor of Science in Information Systems; Minor in Organizational Communication GPA: 3.8/4.0
Coursework: Software Project Management, Data Structures, Human-Computer Interaction, Statistics for Analytics

Projects

Edugamehub1, Personal Project Sep 2025 – Sep 2025
React, TypeScript, Tailwind CSS

- Coordinated the buildout of a mobile-first, offline-capable learning platform for rural STEM students using React, TypeScript, and Tailwind CSS.
- Set up continuous integration to catch build errors before they reached the multilingual interface, reducing last-minute merge surprises.

Bustracker, Personal Project Oct 2025 – Jul 2026
Python, Flask, pandas, scikit-learn

- Built a real-time bus tracking system with Flask and GPS data, applying pandas and scikit-learn to estimate arrival distances.
- Iterated on early distance estimates after inconsistent GPS signals produced unreliable results, tightening the calculation until accuracy stabilized.

NER Explorer, Personal Project Aug 2026 – Sep 2026
Python, spaCy, Streamlit, pandas

- Built an open-source tool that turns RSS news feeds into an interactive knowledge graph using spaCy, pandas, and Streamlit.
- Documented setup steps clearly enough that a classmate reproduced the pipeline without asking a follow-up question.

Activities & Extracurriculars

Coastview Computing Society, Project Coordinator Sep 2025 – Present

- Noticed that project teams often restarted work after unclear task ownership, and introduced a shared checklist assigning owners and deadlines.
- Realized that coordinating handoffs between teammates interested her more than writing any single feature herself.

Awards & Accomplishments

Dean's List, Spring 2025

Skills & Interests

Language: TypeScript, Python, JavaScript
Frontend: React, HTML/CSS
Backend: Flask/FastAPI
Data: Data Analysis (pandas), Data Visualization
AI/ML: Machine Learning, Natural Language Processing
DevOps: CI/CD
Quality: Unit Testing
Mobile: Native iOS/Android, React Native
Product: Technical Writing
