Experience

Northglass Stageworks, Greyfen Aug 2017 – Dec 2020

Theatre Production Technician

- Prepared equipment and cue documentation for touring productions, where a missed setup dependency could surface minutes before a performance.
- After crew handoffs left assumptions unstated, began writing setup notes on prerequisites and recovery steps, valuing repeatable setup and clear boundaries.

Copper Finch Workshop, Greyfen

Feb 2021 – Nov 2022

Technical Operations Assistant

- Maintained handoff notes for shared equipment and traced recurring setup problems to differences in how each shift prepared the workspace.
- Compared failure sequences with coworkers before changing procedures, preserving craft knowledge while easing the process for the next person to reproduce.

Projects

Usersearch, Independent Project

Jan 2023 – Feb 2023

C#, Docker

- Built a C# application across 38 repository files and packaged it with Docker.
- Iterated through 9 commits over 2 active days.

Qilang, Independent Project

Feb 2020 – Mar 2020

C++, Python, Makefile

- Contributed C++, Python and Makefile work to the QI programming-language repository across 29 files, sustained over 121 commits and 15 active days.

Flashmemx, Independent Project

Jan 2021 – Jan 2021

C#

- Worked with a C# codebase spanning 618 repository files.

Education

Greyfen Institute for Continuing Practice, Greyfen

December 2023

Diploma in Software Systems

Coursework: Operating Systems Concepts, Software Construction, Infrastructure Seminar

Activities & Extracurriculars

Greyfen Backstage Exchange, Volunteer Setup Mentor

Mar 2019 – Dec 2020

- Helped volunteers rehearse setup sequences, explaining dependencies aloud to reveal assumptions crew had stopped noticing, grounding discussions in what actually happened.

Skills & Interests

Language: C#, C/C++, Python

DevOps: Docker
